Foreword

Hannover Re

HANNOVER RE

Strategic Partner

Hannover Re is proud to partner with the Malaysian Actuarial Student Association (MASA) as Strategic Partner for the MASA Hackathon: R-Ignite 2026. Through initiatives like the MASA Hackathon, we support actuarial students in applying their skills to real-world risk challenges.

Climate risk and sustainability are actively reshaping insurance and reinsurance. They require analytical depth, structured thinking and forward-looking solutions grounded in data. Through this partnership, students work with real-world datasets, explore ESG considerations, and develop innovative approaches to current risk challenges.

For students, events like this offer a valuable opportunity to apply analytical and modelling skills to practical questions while gaining insights into how the insurance and reinsurance industry approaches complex risks.

Hannover Re is proud to support platforms that develop future actuarial talent and strengthen collaboration between academia and industry. We look forward to seeing how the next generation of actuaries will shape the future of risk analysis.

LEW XUAN YEE

Chairperson

MASA Hackathon 2026: R-Ignite

Malaysian Actuarial Student Association

It is my great pleasure to welcome you to **MASA Hackathon 2026: R-Ignite**. This year's theme reflects the spirit of innovation, creativity, and analytical thinking that drives the evolution of actuarial practice in the digital age. As the world continues to face increasingly complex global challenges, the actuarial profession plays a vital role in developing data-driven insights and sustainable solutions. Through this hackathon, we aim to provide a platform for students to explore how actuarial thinking, technology, and collaboration can be applied to address real-world issues.

The theme **R-Ignite** centres on the growing challenges of climate risk and its impact on the insurance and reinsurance industry. In this hackathon, participants will take on the role of actuarial consultants for a multinational reinsurance firm, exploring how climate-related factors can affect long-term financial resilience. By analysing data from the World Bank's World Development Indicators, participants will examine climate trends, explore their connection to natural disaster insurance claims in Southeast Asia, and apply analytical thinking to propose practical strategies that help organisations better prepare for and manage climate-related risks in the future.

I would like to extend my sincere appreciation to our sponsors and partners for their invaluable support in making MASA Hackathon 2026 possible. We are grateful to our venue partner, ASSA UCSI, and our strategic partner, Hannover Re, for their collaboration and commitment to supporting the development of future actuarial talents. I would also like to thank our organising committee, and judges for their dedication and hard work in bringing this event to life. Finally, I congratulate all participants for embracing this opportunity to challenge themselves and explore innovative solutions. May this hackathon ignite new ideas, foster meaningful collaboration, and inspire the next generation of actuarial professionals to shape a more resilient future.

Introduction

Welcome to MASA Hackathon 2026!

MASA is back with its annual hackathon in 2026, themed “MASA Hackathon 2026: R-Ignite”.

This highly anticipated two-month event offers Actuarial Science students a unique opportunity to apply theoretical knowledge to real-world problems. With a focus on R programming, the hackathon combines workshop and presentation, both held physically at UCSI University (Kuala Lumpur Campus).

Participants will gain hands-on experience, enhance their analytical skills, and network with industry professionals. This event bridges the gap between academia and industry, fostering innovation and preparing participants for future challenges in the actuarial field.

Event Timeline

Key Dates

Event Timeline	Date
Registration	3rd April – 23rd April 2026
Hackathon Commencement	24th April 2026
Hackathon Workshop and Briefing	25th April 2026
Hackathon Preliminary Round (Submission Deadline)	7th May 2026
Hackathon Judging Period	8th May – 22nd May 2026
Hackathon Finalist Announcement	24th May 2026
Hackathon Presentation (Grand Final)	6th June 2026

Event Itinerary

Hackathon Workshop + Briefing

- **Date:** 25th April 2026
- **Time:** 12:00 P.M. – 4:40 P.M.
- **Venue:** UCSI University Kuala Lumpur

1200 - 1230	Registration
1230 - 1240	Opening Ceremony
1240 - 1245	Introduction of Speaker
1245 - 1445	Workshop Session
1445 - 1500	Q&A Session
1500 - 1505	TOA Presentation (Speaker)
1505 - 1525	Break
1525 - 1555	Topic Overview + Sharing Session by Strategic Partner
1555 - 1605	Participant's T&C and Judging Criteria
1605 - 1620	Q&A Session
1620 - 1630	Photo Session
1630 - 1640	Closing Ceremony

Hackathon Presentation (Grand Final)

- **Date:** 6th June 2026
- **Time:** 10:00 A.M. – 5:00 P.M.
- **Venue:** UCSI University Kuala Lumpur

1000 - 1030	Registration
1030 - 1050	Opening ceremony
1050 - 1055	Photo session and Token of Appreciation to sponsors
1055 - 1100	Finalists' introduction & hackathon recap video
1100 - 1230	Finalists' presentation - Session 1
1230 - 1330	Networking lunch
1330 - 1500	Finalists' presentation - Session 2
1500 - 1600	Judges' deliberation and workshops/panel session
1600 - 1610	Token of Appreciation to speakers and judges
1610 - 1625	Lucky draw
1625 - 1635	Results announcements and awards ceremony
1635 - 1645	Overall comment from judges
1645 - 1700	Closing remarks

Problem Statement

Climate Risk Assessment

Background

In the dynamic field of Actuarial Science, data analytics and statistical modelling are integral to understanding and mitigating emerging risks. The demand for precise predictive modelling emphasizes the importance of staying updated with advancements, especially regarding global challenges like climate change. A range of programming languages and analytical platforms are used in actuarial analytics and R is among the most popular due to its open-source nature, strong community support and flexibility.

The hackathon focuses on equipping participants with practical knowledge of analytical tools including, but not limited to, R and Python, enabling them to handle complex socio-economic and environmental datasets and derive actionable insights for long-term financial resilience. By integrating analytical tools mentioned above into actuarial problem-solving, participants will be better prepared to meet industry demands in climate-risk assessment.

Challenge

You are engaged as an actuarial consultant to advise a multinational reinsurance firm exploring how climate-related risks may impact its long-term financial resilience. The client has asked you to perform an independent strategic assessment using the [World Bank's World Development Indicators \(WDI\)](#)

***Please download the "Wide format" data.**

Key Considerations

- Identify and discuss environmental, energy or socio-economic indicators that are most informative for understanding climate-related risks. Highlight and justify significant relationships or patterns.
- Construct a model to predict greenhouse gas emissions (or another climate-related indicator you consider relevant) for 2024. Discuss your assumptions, pre-processing steps, validation methods, and reasoning for the selected model. Explain the implications of your model.
- Explain the relationships between climate indicators and natural disaster insurance claims. Given that the client has regional exposure in Southeast Asia, compare the trends in natural disaster insurance claims between two Southeast Asian countries. Support your analysis using external research or open-source data.
- Propose a climate-related mitigation strategy related to the client. Using your baseline model as the reference point, conduct a stress test to project the impact of your selected strategy to your selected climate-related indicator by year 2030.

Summarise key insights for the client. Highlight limitations and uncertainties. Provide actionable recommendations for strategic risk management.

Execution Process

Participants will work with the World Bank’s World Development Indicators (WDI) “Wide format” dataset, alongside external research on natural disaster insurance claims. Throughout the hackathon, they will explore key data preprocessing techniques, including cleaning, transformation, and structuring of global climate and economic indicators using various data analytics tools and programming languages. Leveraging these techniques, participants will analyse the dataset to uncover meaningful patterns, develop predictive models, and perform stress testing to assess potential impacts of climate-related risks on insurance claims.

During the Grand Final, participants will present their solutions, supported by reliable external data, to a panel of judges. This process encourages both technical proficiency and strategic thinking in managing climate-related risks.

Presentation Breakdown

15 minutes	Presentation
10 minutes	Q&A Session
5 minutes	Buffer Time + Marks Tabulation
30 minutes	Total Time per Team

Rules & Regulations

Registration

- Participants must register as part of a team via the official registration platform by the deadline announced on MASA's official channels.
- The MASA Hackathon is open to all undergraduate students only.
- Teams must consist of three to five (3-5) members. Each individual may join only one team, and registration is non-transferable.
- By registering, participants agree to comply with these Terms & Conditions and all event guidelines.

Participation

- Registration: Teams are required to fill in an online registration form (URL: <https://forms.gle/BaKzEJWaQ1sZD4HG8>), no later than 11:59 p.m. on 23rd April 2026. The form will be made available at 12:00 p.m. on 3rd April 2026. Any appeal for an extension of the registration period will not be entertained.
- Problem Statement Release: The problem statement and dataset will be released by 12:00 p.m. on 24th April 2026 (Friday).
- Final Entry Deadline: Final submissions must be attached to a completed entry submission form "Submission Form" no later than 11:59 p.m. on 7th May 2026 (Thursday).
- Late Submissions: Submissions received after the Entry Due Date are ineligible for participation in the Hackathon.

Submission Guidelines

- Submission Channel: Submissions will be accepted via the entry submission form (URL: <https://masahackathon2026.vercel.app>).
- Entry Limit: Each Team is allowed to submit only one Entry in this Hackathon.
- Multiple Submissions: If a Team submits more than one Entry, the latest submission received prior to the Entry Due Date will be judged.
- Originality: A Team's submission and all supporting work must be completed solely by the Team. All submissions must be the original work of the Team and created in response to this Hackathon. Submissions found in part or entirety to be other than original work created for this Hackathon will be disqualified.

Submission Criteria

- Preliminary Round Requirements

- Report Format and Specifications

- Cover Page: The cover of the submitted report must state the Team's name, names of each Team member, and their respective university(s).
- Language: Submissions must be in English.
- Length Constraints: The body of the report's length cannot exceed 10 pages. If the body of the report exceeds 10 pages, only the first 10 pages will be considered.
- Formatting Requirements: Reports must have 1-inch (2.5-cm) margins and a 12-point font size. Reports with narrower margins or smaller font sizes will be downgraded during judging.
- Page Limit Exclusions: The cover page, table of contents, bibliography, and appendix/appendices will not count toward the 10-page limit.
- File Format: The submitted report must be a single document in PDF (.pdf) format.
- File Size: The report file must be a maximum of 100 megabytes.

- Source Code Specifications

- File Format for R: ".R" or ".Rmd"
- File Format for Python: ".py" or ".ipynb"
- Comment Requirements: The submitted code file must include comments to explain code chunks.
- README file with setup & replication instructions.

- Appendices and Supporting Documents

- Optional Materials:
- Appendices and supporting documents are optional; up to three are allowed.
- Appendices and supporting documents must be submitted in one document or file.
- Each Entry will be comprised of the entry submission form plus a maximum of four files. Each file must be a maximum of 100 megabytes. Files larger than 100 megabytes will not be entertained.

- Final Round Requirements

Presentation slide deck - TBA

AI Usage Policy

- Documentation: Any generative Artificial Intelligence (AI) tools used in developing a submission shall be acknowledged and documented responsibly and appropriately.
- Accountability: The Team is accountable for the originality and integrity of the content of the Team's research and work and for ensuring any AI-generated output, citations, or references have been validated.

Awards

- Winners: Three Teams will be selected as winners (first-place, second-place, and third- place) and are entitled to receiving awards in the form of cash prizes.
- Publication Rights: Teams agree that if their submission is selected as a place winner, finalist, or semi-finalist, it may be posted or published by organizations authorised by MASA ("Organiser").
- Determination Date: Winning Teams will be determined on 6th June 2026 (Saturday).

Liability

- Technical Liability: Neither the Organiser, Strategic Partner, nor authorised companies ("Releasees") are responsible for incorrect transcription, human error, technical malfunctions, lost/delayed data transmission, omission, interruption, deletion, defect, line failures, or inability to access online services.
- Equipment Damage: Releasees are not responsible for any injury or damage to a Team's computer or property related to participation in this Hackathon.
- Missed Entries: Releasees are not responsible for lost, late, illegible, or misdirected entries.
- Organiser Rights: The Organiser reserves the right to cancel, terminate, modify, or suspend the Hackathon if it is not capable of being executed as planned due to technical failures or events beyond control.
- Third-Party Use: The Organiser is not responsible for any unauthorised use of Your submission by third parties.

Data Protection and Privacy

- Usage: Personal information will only be used for winner selection, addressing questions regarding content, communicating news pertaining to the Challenge, or as permitted in these Official Rules.
- Data Protection: Organisers will not disclose, give, sell, or transfer any personal information unless required by law or with consent.

Participants Obligation and Licensing

- Publicity Consent: Teams and individual members ("Model") consent to the use of their names, emails, submission, biographical information, photographs, and/or likenesses for advertising and publicity purposes without additional compensation by the Organisers and Strategic Partner ("Client") and authorised companies. Specifically, the Model grants the Client a right of use, unlimited in terms of content, time, and place, to any Recordings created with her/his consent as described in these Official Rules. This right of use includes the duplication and/or making available of such Recordings to the public on the Client's intranet, websites, and social media profiles (including but not limited to YouTube, LinkedIn, and Instagram).
- License Grant: Teams grant the Client and authorised companies a perpetual, royalty-free, non-exclusive, non-transferable, non-revocable license to publish, display, and reproduce their submission and any associated research in any and all media, in whole or in part, for any purpose including commercial purposes.
- Formatting Rights: The Model grants permission to format or edit their submissions to suit various publication requirements at the sole discretion of the Client.
- Indemnification: Each individual on a Team agrees to defend, indemnify, release, and hold harmless the Organiser and Strategic Partner from any and all losses, demands, damages, rights, claims, injuries, actions, and liabilities arising out of Hackathon participation.
- Waiver of Damages: Each individual waives the right to claim any additional damages whatsoever, including but not limited to punitive, consequential, incidental, or indirect damages.
- Intellectual Property Integrity: All submissions must be original work. Plagiarised, previously published, or third-party work will result in disqualification. Participants must ensure submissions do not infringe on third-party intellectual property rights.

Judging Criteria

Evaluation Criteria Distribution

Evaluation Criteria Breakdown

Weightage	Criteria
20 %	Problem Framing and Preliminary Data Exploration
	- Defines a clear, relevant problem/ opportunity aligned to business context. - Demonstrates a clear understanding of significant relationships and patterns using insightful visuals and explanations.
20 %	Modelling and In-Depth Data Analysis
	- Uses clear and defensible assumptions, and pre-processing steps. - Justifies the selected model using appropriate validation methods and ensures the selected model fits the defined problem. - Discusses model implications, limitations, and future improvements.
20 %	Financial Impact Assessment
	- Translates findings into financial or operational implications using credible external sources. - Defines a relevant stress scenario and applies scenario assumptions to derive a justifiable projection.

20 %	Strategic Risk Management Recommendations
	- Summarises key insights and highlights limitations and uncertainties. - Provides actionable risk management recommendations linked to analysis
20 %	Overall Storyline and Presentation
	- Provides a clear storyline with structured organisation and formatting of information. - Clearly communicates key messages and professionally addresses questions.
10 %	Bonus Points (Optional)
	- Demonstrates outstanding technical skills and originality EXAMPLES: <i>provides interactive dashboards/ apps which address the questions, links analysis to relevant policy documents/ international treaty on climate change.</i> - Articulates information with exceptional clarity and executive readiness (e.g. uses a one-slide summary, message headers, crisp narratives)

Submission

Submission Information

Platform: Official Submission Portal

Submission Link: <https://masahackathon2026.vercel.app>

Registration Form Link: <https://forms.gle/BaKzEJWaQ1sZD4HG8>

Submission Period: 24 April 2026 – 7 May 2026 (11:59 p.m. GMT+8)

Late Submissions: WILL NOT BE ACCEPTED

Submission Components

All components must be submitted by the deadline.

1. Project Report (MANDATORY)

- Cover page with Team Name, member full names, universities
- Written in **English**
- Main body: **MAX 10 pages**

Website : <https://www.masassociation.org/>

LinkedIn : <https://www.linkedin.com/company/masassociation/>

- Format: PDF only
- File size: **MAX 100MB**
- Margins: 1-inch (2.5cm)
- Font size: Minimum 12pt
- Cover page, table of contents, bibliography, appendices: **NOT counted in 10-page limit**

2. Source Code & Supporting Files (MANDATORY)

- Full source code (including comments) used for data processing, modelling, analysis and visualisation
 - o File Format for R: ".R" or ".Rmd"
 - o File Format for Python: ".py" or ".ipynb"
- README file with setup & replication instructions

3. Appendices & Supporting Documents (OPTIONAL)

- Maximum **3 supporting files**
- Combined into **single file**
- Max size: 100MB per file

4. AI Usage Documentation (MANDATORY if applicable)

- Full list of generative AI tools used
- Validation & accountability statement
- Confirmation that all AI output has been checked & verified by the team

5. Presentation Slide Deck (FOR FINALISTS ONLY)

- Slides for final presentation (15-minute slot)
- Used for Grand Final at UCSI University on 6 June 2026

Official Submission Form Structure

First Part: Team Details

- Team Name
- Team Leader Details
 - o Full Name
 - o Email Address
- All Team Member Details
- Deliverables

Website : <https://www.masassociation.org/>
LinkedIn : <https://www.linkedin.com/company/masassociation/>

- Declaration of Originality & Compliance with Official Rules

Second Part: Project Details

- Project Title
- Tools & Technical Stack Used
- Dataset Source (World Bank WDI Wide Format)
- Supporting Files
- Executive Summary: Page 1 of the report must include a one-paragraph summary of your entire report.

Third Part: Project Evaluation

Project Setup

- Describe the climate risk challenge addressed
- Explain relevance to reinsurance, financial resilience, and Southeast Asia
- Explain alignment with hackathon theme

Implementation

- Describe your analytical/model architecture
- Explain data preprocessing, modelling, validation steps
- Justify choice of model, variables, and statistical methods
- Explain how the programming was used as the core tool

Testing & Validation

- Explain model validation & sensitivity testing
- List 3 key improvements made during testing
- Highlight 1 major technical challenge and how you solved it

Success & Completion of Solution

- How your solution fulfills ALL client requirements
- Key findings, insights, and financial implications
- Stress test results and 2030 projections
- Limitations, uncertainties, and assumptions

Scalability / Next Steps

- How your model can be applied to more countries/portfolios
- Industry adoption & real-world implementation plan
- Future improvements for actuarial practice

Prizes & Awards

- **Champion:** RM 3,000
 - **1st Runner-Up:** RM 2,000
 - **2nd Runner-Up:** RM 1,000
- *prizes shared equally among team members
- **Certificate of Participation:** All eligible teams that submit on time
 - **Certificate of Achievement:** All shortlisted finalists

Profile

Judges Profile

ALYAA NUVAL OTHMAN, FCAS, Actuary P&C Hannover Re

Alyaa is a Fellow of the Casualty Actuarial Society and currently focuses on P&C valuation and IFRS 17 enhancements at Hannover Re, Malaysian Branch. Prior to her current role, she gained broad experience across the P&C (re)insurance industry, spanning reinsurance underwriting and pricing for key East Asian markets – including China, South Korea, Japan, and Taiwan

– as well as direct insurance reserving and capital modelling for the Malaysian market. Alyaa has supported strategic underwriting decisions through treaty pricing and portfolio analysis, and she has streamlined actuarial valuation workflows through enhanced automation and documentation.

BRANDON TAN CHUNG REN, Risk Analyst Hannover Re

Brandon's current role at Hannover Re, Malaysian Branch focuses on climate and ESG risk management, including integrating climate considerations into risk frameworks, regulatory reporting, and capital assessments. He has been involved in assessing climate-related risks, supporting stress testing, and aligning risk practices with evolving regulatory expectations.

In addition, he also focuses on capital management and operational risk oversight. Prior to this, he worked extensively in catastrophe modelling, delivering analytics, treaty pricing support, and exposure analysis across reinsurance and specialty portfolios, including coordination across regional teams.

WEI LUN WONG, FIA, Pricing Actuary Hannover Re

Wei Lun is a Fellow of the Institute and Faculty of Actuaries (IFoA) and currently works as a Pricing Actuary at Hannover Re, Malaysian Branch. Before stepping into reinsurance, he developed his actuarial career in the primary insurance sector across both the UK and Malaysia. Wei Lun possesses strong technical expertise in Pricing, Reserving and Data Science. He achieved a Kaggle Master status in 2017.

Workshop Speaker Profile

**WAN JUN-HO, Regional Actuarial Analyst
Allianz Partners**

I am an experienced GI actuarial analyst with my career built around the pricing practice and reinsurance. I have experience in pricing and many other financial analyses (e.g. reserves, capital, etc.) throughout my career in multiple major LOBs (Motor, Fire, Travel and Accident, etc.) in both the perspectives of an insurer and reinsurer.

Panelists' Profile

DANIEL LIM, FIA C.Act, FASM, Consulting Actuary Milliman

Daniel is a qualified actuary based in the Milliman KL office with 5 years' experience. He specialises in life insurance and family takaful, and has contributed to consulting projects across Southeast Asia.

He has worked on Climate Risk Stress Testing (CRST) exercises for several insurers and takaful operators. His project experiences include regulatory reviews covering valuation processes, management of participating business (MPB), Prophet modelling, and various ICAAP-related reviews. He also is experienced in M&A and embedded value review work.

WANG ZHAO LOON, Manager, Enterprise Risk Management MSIG Insurance (Malaysia) Bhd

Zhao Loon is a risk management professional with approximately seven years of experience across various risk domains, with a primary focus on financial and sustainability risk management.

He currently serves as the Manager of Enterprise Risk Management (ERM) at MSIG Insurance (Malaysia) Bhd, where he plays a key role in supporting the company's climate risk management initiatives, including strategy development, cross-functional integration, risk appetite review, metric design, disclosures, and stress testing. He is a member of the Actuarial Society Malaysia (ASM)'s Climate Risk Working Group and holds a BSc (Hons) in Actuarial Science from UCSI University Malaysia, along with a certification in Sustainability and Climate Risk (SCR) from the Global Association of Risk Professionals (GARP).

**SHAHIDA MOHD JAFFAR SADIQ MARICAR,
Head, Corporate Sustainability,
Employees Provident Fund**

With over 2 decades of banking and capital markets experience in Malaysia and the United States, Shahida currently leads EPF's efforts to entrench sustainability in its investments as well as operational activities. She is passionate about creating sustainable business models and has a proven track record of enhancing existing ecosystems to be more climate resilient and sustainability conscious.

Before joining EPF, Shahida held various leadership roles in Maybank Group, including Director of Sustainable Business of Maybank's Group Sustainability Department where she was instrumental in curating and developing the Maybank Group Sustainable Product Framework in 2022 (the 1st by a Malaysian Bank) and the Maybank Group Transition Finance Framework in 2023 (also the 1st by a Malaysian Bank). Prior to that, she held the position of General Manager of Maybank New York where she acted as the country head for Maybank's US operations.

Shahida's experience with Maybank was predominantly in the wholesale and investment banking segment where she was instrumental in executing various landmark equity transactions.

Her extensive banking and investment banking experience has enabled her to adopt a principled-pragmatic approach to integrate sustainability into strategic and operational activities.

Outside of work, Shahida enjoys travelling and watching horror movies.
